

4th Grade Math Rubric – Operations and Algebraic Thinking

Criteria	4	3	2	1
Word Problems	Student uses the correct operation to solve and makes no computational errors.	Student uses the correct operation to solve and makes occasional computational errors.	Student uses the incorrect operation to solve and/or has many computational errors.	Student has little or no understanding of the operation needed to solve.
Factor Pairs	Student can find all factor pairs for any whole number 1-100 with no errors.	Student can find factor pairs for whole numbers 1-100 with few errors.	Student can find factor pairs for whole numbers 1-100 with numerous errors.	Student has little or no understanding of finding factor pairs.

Criteria	4	3	2	1
